Tony Abbott
(Federal Health Minister)

Level

Sydney Road,

Manly 2095

Ph: 99 / Fax: 99

Dear Mr Abbott,

Hi again. Thank you for taking note of my last letter/fax.

I would just like to clarify a few points, just to let you know where I am at with things.

I am in the middle of a life education course called Landmark.

I want to go on TV and generate support for my cause. My plan is also to develop a website to spread the message- which is where the "Cc Everyone" came from at the bottom of the last letter/fax. (I do not intend to display your name or details on the internet).

If my last letter was a bit "enthusiastic"- I acknowledge that.

I AM STILL COMMITTED TO FOCUS ON MY WORK, UNTIL PEOPLE STAND UP, OUT OF THEIR WHEELCHAIRS AND WALK! as previously stated. Keeping in mind that there are many steps to be taken which strongly takes into account the aging population.

I would like to offer you my transparency and integrity, regarding my concept, that would reduce the financial impact of the aging population. I feel that my concept could empower the health system by making people realise that they are responsible for their own health. This could be done in such a cost effective way, as disability costs the community in so many ways.

I request that you keep an open mind to my professional vision and passion, as I work my way through to achieving my life long goals. When you next have a quiet day, when you are in Mosman, I would be delighted to show you what I am up to (it would only take 5 minutes)

Warmest wishes,

Monte Elissa
